

CNW-520

Wrapping Maching

CNW is the safest wrapping machine equipped with an all stainless steel heating plate inside the body, which is covered with an aluminum sheet to protect against electricity leakage. It's stainless body protects against rust and moisture which allows it to be used in various environments.

CAS

FEATURES

- Designed with safety in mind.
- Inside Heating plate is wrapped with an aluminum sheet to protect from electricity leakage.
- Outside heating plate is coated two times with teflon.
- Stainless steel body - Protect against rust and moisture.
- Embossed heating plate - Prevent items from slipping about.
- ON/OFF switch for the heating plate. Able to control the temperature of the heating plate as well as the power on/off function with just one turn.
- Switch for heating the cutter, can be set for 15A according to user's taste (6A is standard)
- EGI in the plate is coated with zinc to protect against salt, which can cause erosion.

TECHNICAL DATA

Model	CNW-520
Dimension	470(W) x 600(D) x 100(L)
Temp. of H/P	90°C Max
Temp. of H/C	150°C Max
Voltage	220V/50-60Hz
Wrapping Length	500mm Film
Power Consumption	175W
Weight	6kg
