

# TUFF

## Load Bar Scale

The Load Bar is one of popular and versatile scale which is ideal for placement under platforms, crates, crushes, livestock weighing and wool-presses. Shock absorbing mounts protect the load cells and maintain weighing accuracy in spite of distortion or expansion/contraction of the crate or crush to which the load bars are fitted. TUFF Load bars are manufactured with toughened steel and finished with powder coating. Other applications for our load bars would be in warehouses for pallet weighing.

- Two weigh bars as standard
- Easy, portable and accurate weighing
- kg / lb / oz unit selection
